1/n. A surface display in Norvalampi, Rovaniemi, on 12 December 2023. This is practically the same display as the previous day (<https://t.co/rIRNYNyAEz>), just amped up.

Here are shown three versions 1179 frame stack and a single frame. In the following posts are the crystals, photos turned out better than the previous day.

I tend to see a recurring feature of funny angles (also in other displays) that I have marked with arrows in one of the photos. But are those faces actually a bit caved in? Is perspective also playing tricks on me? Anyway, clearly these are of no consequence as the display is perfectly normal odd radii.

2/n. Norvalampi, Rovaniemi, on 12 December 2023. Two versions of a 99 frame max stack.

3/6 - 2024-02-17 11:33 UTC

3/n. Norvalampi, Rovaniemi, 12 December 2023.

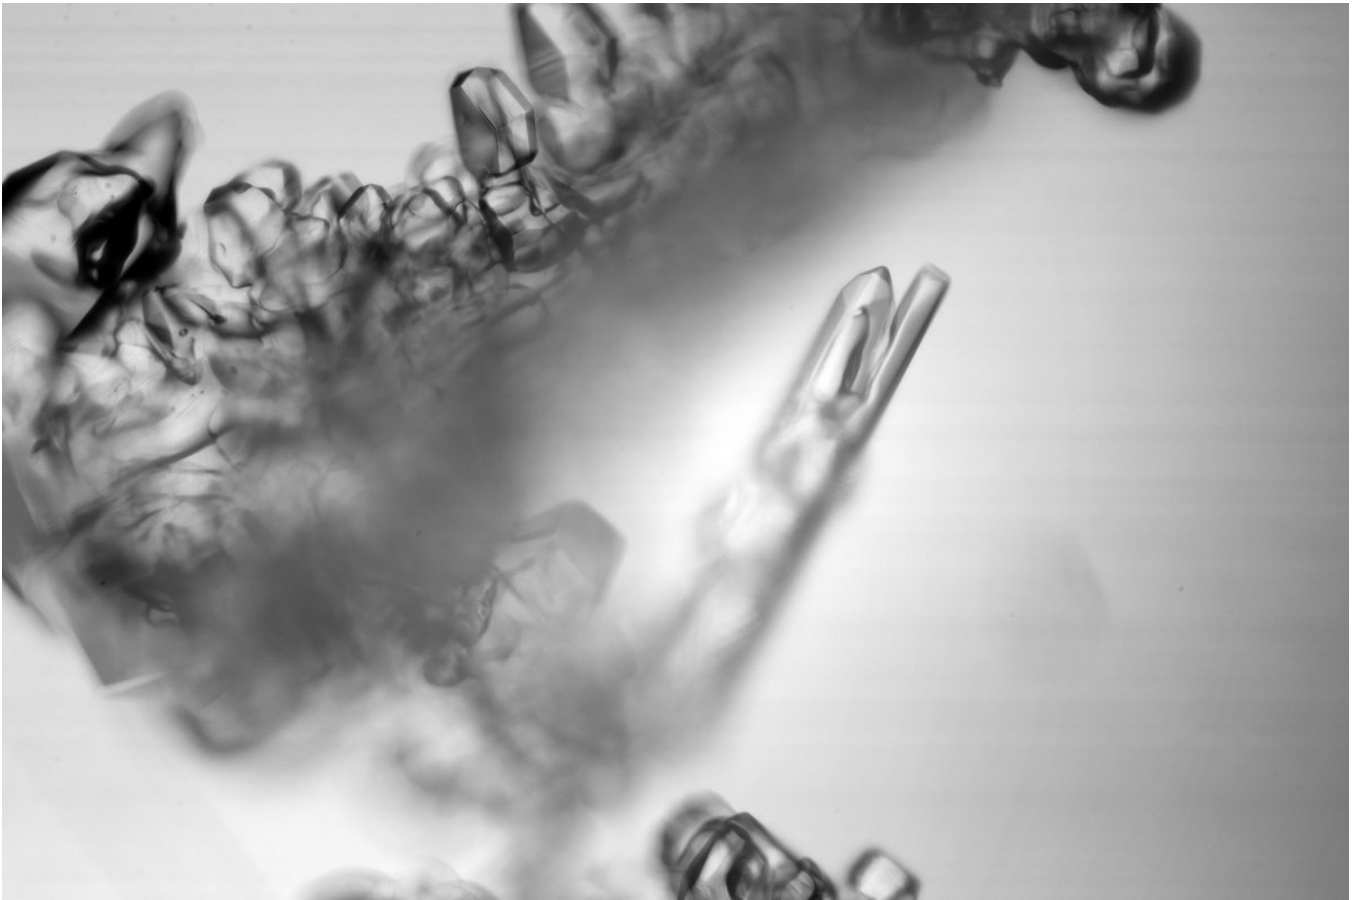

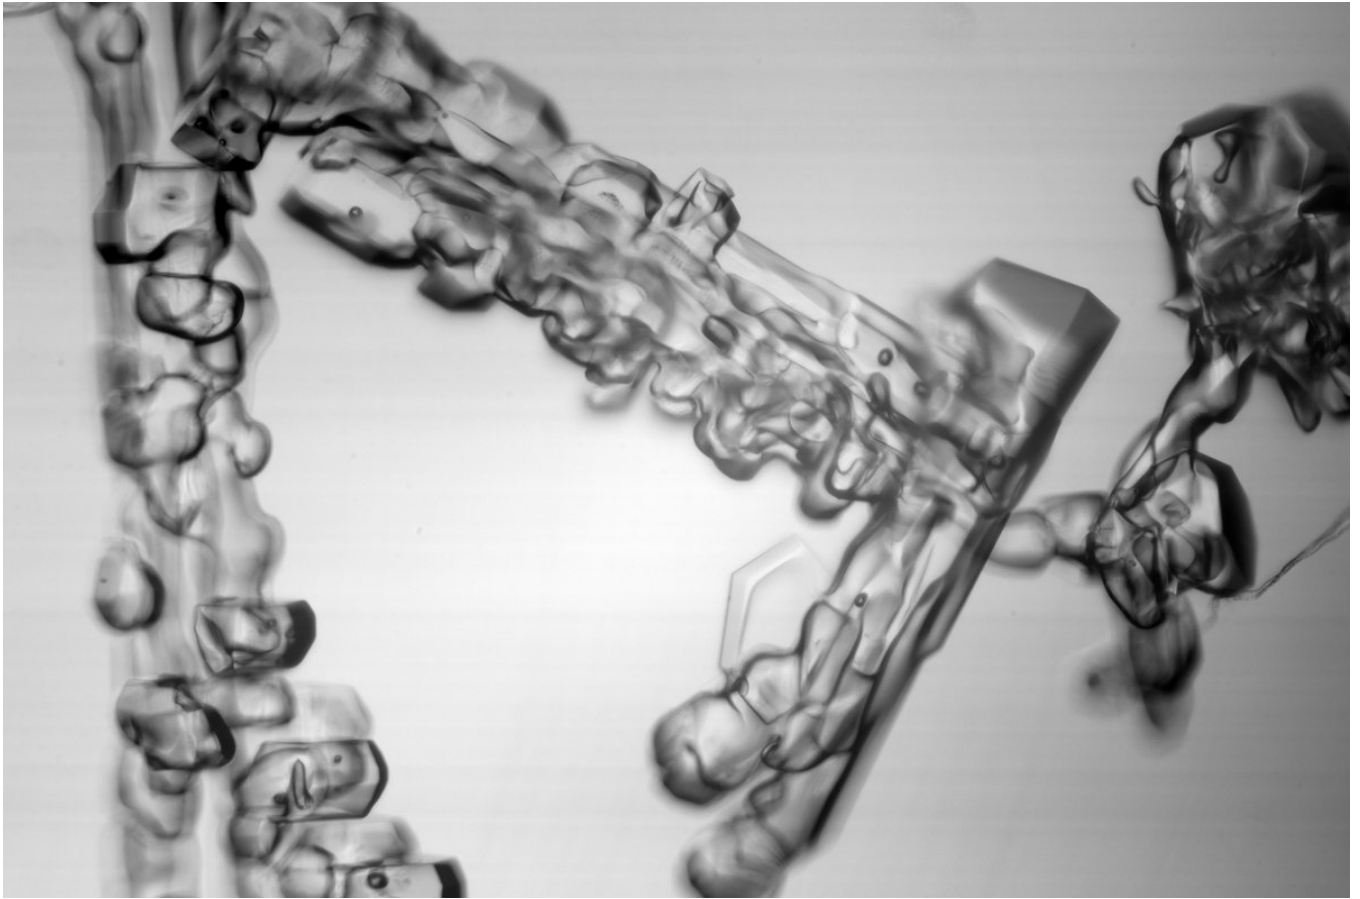

4/6 - 2024-02-17 11:34 UTC

4/n. Norvalampi, Rovaniemi, 12 December 2023.

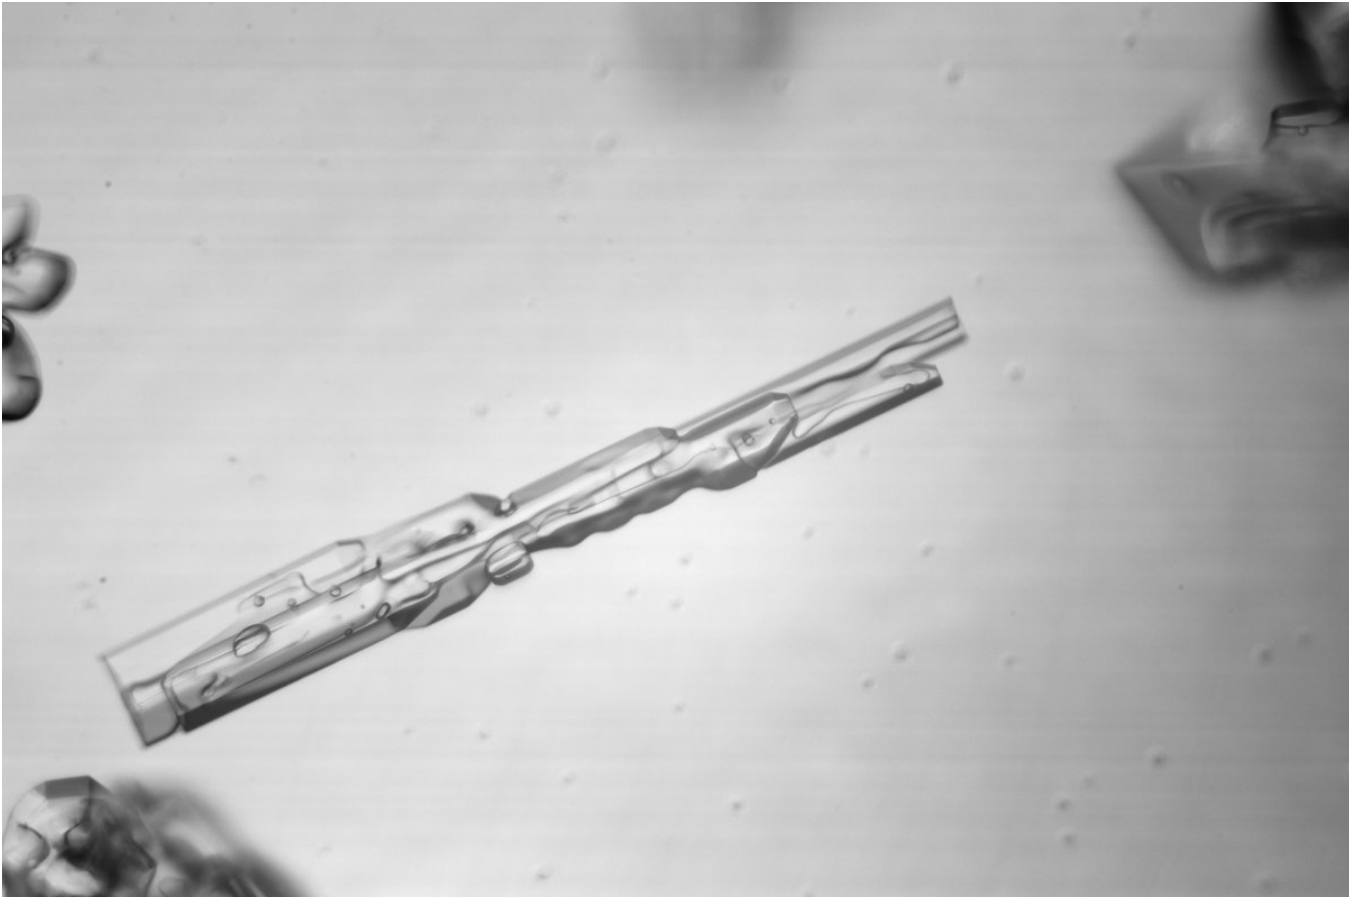

5/6 - 2024-02-17 11:35 UTC

5/n. Norvalampi, Rovaniemi, 12 December 2023.

6/6 - 2024-02-17 12:30 UTC

6/n. Norvalampi, Rovaniemi, 12 December 2023. As this thread stopped accepting anymore crystal photos, more in a new thread: <https://x.com/RiikonenMarko/status/1758830150727106736>
