@hoshi_kinuta @HIGEHIGErainbow @ayatsuka_yuji @kagakusuru_sora @GritsevichMaria @brossamadoz @loveJapanSky @RunnanLin Congrats. A precious one in solar. Wonder how many we have in total. Of the halo folks, I can recall only Tomas Trzicky having captured this before. His was also the first ever solar catch, 31 July 2009. <https://atoptics.co.uk/blog/rare-subhorizon-halo/>
