They have started the guns. I visited the slopes in the daytime and saw one propel gun hauled halfway the landing hill. Now a new visit in the evening and that gun was running. The red outdoor digital display stood at only -2 C. Nothing doing at the ski center slopes. But they had laid a thick deposit snow from last winter half-way up two slopes.

Anyway, it is too windy tonight. Apukka 4m/s, gusts 6m/s. Tomorrow looks better.
